Declaration on compliance with the EU Deforestation Regulation

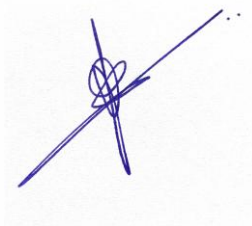

To whom it may concern

The new EU deforestation-free regulation (EUDR) came into force on June 29, 2023, with the aim of ending deforestation and forest degradation worldwide. This regulation prohibits the production, import into and export from the EU of products based on coffee, among others, that contribute to deforestation and/or are illegally produced. At the moment it is foreseen that the regulation goes into effect on December 31, 2025.

As a trader downstream in the supply chain, Maas International B.V. (MAAS) is affected by this regulation. Therefore, we are making the necessary preparations to be fully in line with the regulation at its implementation date:

- MAAS verifies that all relevant imported products (coffee, cocoa, etc.) meet the requirements included in the regulations, based on the due diligence statements (DDS) it receives from its suppliers.
- After conducting the required due diligence, MAAS will pass on the diligence statement it receives from their suppliers. This will be reported on the delivery note of each delivery of relevant products.

With Kind Regards

Marc van Houten
